

Vibrant, youthful skin  
is the desire of men  
and women everywhere.

The Laser Rejuvenation procedure utilizes laser technology that can safely, discretely and effectively treat small targets, like fine undesirable facial imperfections and diffuse redness, by gently warming the upper dermis, improving the appearance of your skin.

Unlike many other treatment methods, Laser Rejuvenation is a comfortable, non-ablative form of skin therapy. This means you will be able to see subtle yet consistent results after each treatment, without the unwanted side effects such as bruising or excessive skin irritation.

The result is a healthy-looking and vibrant appearance.

## Laser Hair Removal

## Laser Vein Removal

## Laser Rejuvenation

For a healthier, younger-looking you!

## Laser Hair Removal

We use the latest in technology for effectively treating the hair with any skin color including tanned skin with no adverse effects. Patients can resume a normal lifestyle within minutes of treatment.

## Laser Vein Removal

We can now successfully treat a wide range of unsightly vascular lesions, from fine facial veins, spider veins and vascular birth marks to larger leg veins. Our treatments are non-invasive, fast, safe and effective. Because there are no painful injections or incisions, patients can resume normal activities within minutes of treatment.

## Laser Rejuvenation

We can safely minimize scarring, pore size, rosacea, sun damaged skin and more. Laser Rejuvenation increases the collagen we lose as we age and is FDA approved for wrinkle reduction. With no messy gels or numbing creams patients can quickly resume normal activities.

Laser treatments are fast, safe  
and effective on any area of the  
body with any skin color. Tans ok!

Please call our office or check out our website for additional information regarding the world's most advanced treatments to help you look and feel your best.
